News No.9 dated 05/06/2009

BIKETRIAL CANADA

Riding clinic for kids

Hiro sent his e-mail to Mike to ask about recent situation about influenza A H1N1 in Vancouver. Here is a report from Canada.

> Hi from Shirley Baia
> Hiro This is just a friendly letter to assure you that everything in our area is fine. We don't hear too much about the flue anymore. The cases that have been seen in BC are all mild and it doesn't seem to be spreading. No one here is really concerned. Our weather is beautiful and our teaching clinic was successful. I have attached some pictures. Jeremy is putting together the Crankworx webpage and Trialworx again will be a big part of the Bike Festival. We are all looking forward to a fun time in Whistler. Our Trials community is growing nicely. Jeff and Steve are involved this year in making some changes to our trials park funded by the community. We do hope you will be able to come this year. There are so many beautiful things to see and do in Vancouver and lots of excitement getting ready for the Olympics. We are already seeing a lot of tourists in our beautiful city.

> Dear Shirley,
> Thanks a lot for many nice photos. I like them! And thanks for your report about situation now in Vancouver. I think it is good to know that everything in settle as usual. Below is the news about influenza today. I know the government does not want to make

much report about this for too much trouble if thinking about the influence of economy damage. But there is still a possibility about the variation of the virus in the future. (short cut) Therefore, I still cannot decide any trip except WBC. I hope things will be better soon.

Sincerely yours,

Hiro
