**BIU MEETING IN SONICO**

**Dear Hiro,**

**all is ready in Sonico to have a good discussion.**

**We have time and space and people to decide and vote.**

**We have also time during the week before to understand the position of all in the council.**

**Now we must vote the President and all the figures in the Presidium.**

**Next President must work with the Presidium.**

**Will be next President the candidate that accept to work with Presidium.**

**I ask you officially to insert my name also for this position: General Secretary.**

**I am candidate now for one of this position:**

**President.**

**Vice President.**

**General Secretary.**

**Thank you very much,  
Giuliano**

**Dear Giuliano and Libor,**

**I got the proposal from BAC for many things.**

**Some of them, I do not understand.**

**IF we discuss all these things,**

**the meeting will be over with only their matters.**

**What do you think?**

**Sincerely yours,  
Hiro**

**Dear Hiro,**

**In my opinion is the first and most important goal to set up in Sonico a new BIU Presidium:**

- President
- Vice president
- Technical director
- Organizational director
- Riders' delegate

This Presidium has to agree Presidium working regulations.  
Presidium separately names General Secretary...it is not necessary at General Meeting.

Afterwards Presidium can deal step by step (electronically) with all proposals collected in Sonico.

I hope it is helpful.  
Libor

Dear Hiro,

I think that the order of discussion in Sonico will be very simple:

- 1) Election of new member of BIU Presidium (not only President and GS).
- 2) Streamlining of procedure of decision of the Presidium with electronic vote.

With electronic vote the Presidium will be able to decide all things in very fast time.

I think new proposal are very important but, of course, it's impossible can discuss everything in Sonico.

Best regards,  
Giuliano

Dear Giuliano, Dear Libor,

I agree with you. Our new start from Sonico is most important.

Sincerely yours,  
Hiro

Dear Mr. President Hirano,
